

ITVMH CLASSES

INTRODUCTION:-

YOU HAVE LEARN

JAVASCRIPT

NODEJS REACTJS EXPRESSJS MONGODB MONGOOSE

BOOTSTRAP-5

JWT OAUTH

AFTER LEARNING THIS ALL YOU WILL BECOME UNSTOPABLE AND AS
A FULL STACK DEVELOPER.

TOTAL PROJECT :- 11 PROJECT

HAPPY LEARNING

JAVASCRIPT:-

- Console Log, Warning, Error
- Variable Let, Const, Var
- Data Types
- Type Conversion And Coercion
- String Method Literal
- Array
- Conditional Statement
- Loops
- Function
- Window Object
- DOM
- Webpage Crawling
- Element Selector
- Children Parents Traversing The DOM
- Events
- Smart Page Crawling (Exercise 1)
- Local And Session Storage

- Creating Editable Div(Exercise 2)
- Notes Taking Websites
- Date Objects
- Improving Smart Notes
- Objects Literals
- Object Prototype
- Project 1:- Notes With Title(Exercise 3)
- Prototype Inheritance
- Es6 Classes And Inheritance
- Implementing A Library Classes(Exercise 4)
- Project 2 :- Build A Collage Library Website
- Asynchronous
- Ajax
- Callback Function In Javascript
- Using A Directory Api(Exercise 5)
- Promise Basic,Then() And Promise.Catch() Function
- Project 3:- Create A News Website
- Arrow Function In Javascript
- Fetch Api In Javascript
- Async/Await
- Error Handling
- Regex In Javascript
- Project 4:- Form Validation
- Iterators
- Creating A Alaram App(Exercise 6)
- Generator In Javascript
- Project 5:- Creating Cv Scanner
- For Of Loop Vs For In Loop
- Javascript Maps
- Javascript Sets

- Javascript Symbols
- Javascript Destructors
- Javascript Wall Clock(Exercise 6)
- Project 6:- Post Man Clone
- Drag And Drop Element
- Creating A Calculator Using Html Css Js
- Javascript Advance Concept If Any Remaining
- Important Projects:- Music Players
- Important Projects:- Ecommerce In One Page
- Important Projects:- Advance Form Validation

MERN(MONGODB,EXPRESSJS,REACTJS,NODEJS)

INTRODUCTION:-

NODE:-

- Introduction To Node Js
- Install Nodejs Npm Vscode
- Prerequisites
- Complete REPL
- Mastering The Node Js Core Module
- CRUD Operation Using Fs Module
- Nodejs Asynchronous File System Core Module
- Synchronous Vs Asynchronous
- Asynchronous CRUD Operation
- OS MODULE
- PATH MODULE
- Import Export
- Npm
- Nodemon
- Module Wrapper
- Create Your Own Server

- Nodejs Routing
- Complete Json In Node Js
- Create Simple Api
- Event Module Events
- Stream And Buffer
- Stream Pipes
- Project:- Html Css Nodejs Weather API
- Project:- Dynamic Quotes Website

EXPRESS:-

- Express Intro Setup
- Js Routing
- Send Html Json Data
- Serve Html Css & Js Files
- Responsive Website Using Html Css Express Js
- Template Engine
- Customize Your Views Directory
- Using Partial
- Add 404 Error Page
- Responsive Styles
- Weather Api Using Express Js
- Complete Web Development
- Host Website

MONGODB:-

- Intro Mongo Db
- Installation
- Database Collection And Document
- CRUD
- Install Mongodb GUI

- MongoDB Compass
- Mongoose | Connect MongoDB Nodejs Expressjs
- Create And Insert The Document Using Express In Mongo

Db Using Mongoose

- Mongoose Schema
- Insert Multiple Documents Using One Line
- Read Or Query The Document Using Mongoose
- Comparison Query Operation
- Logical Query Operation
- Sorting And Count
- Update The Document
- Delete Document Using Mongoose
- Built-In Validation
- Own Custom Validation
- Using Npm Validator Package
- POSTMAN Tutorial
- RESTFUL API
- Creating API
- Complete Registration Form/Login Form
- Encryption Vs Hashing
- Secure Registration System Password With Bcryptjs
- Nodejs Authentication
- JWT Oauth Using Nodejs And MongoDB
- Logout From All Devices
- Complete Responsive Dynamic Website Using Html Css

Nodejs Express B5 MongoDB Mongoose

REACT FULL COURSE AND INDEX WILL UPLOAD SOON
